

AUTOSAN

EUROLIDER 9

Universal bus intended for local, intercity
and regional passenger traffic.

CHASSIS

A three-dimensional stainless steel lattice frame integrated with framework of the body.

Driveline

CUMMINS B6.7E6D290C EURO VI engine, power 211 kW (287 HP).

Manual transmission with electromagnetic retarder.

Axles and wheels

Rear axle: DANA.

Front axle: ZF independent wheel suspension.

Driving wheels: tires 285/70 R19,5.

Brakes

Service brake: pneumatically controlled, disc-type, with EBS/ESC system.

Parking brake: mechanical with spring actuator, acting on rear wheels.

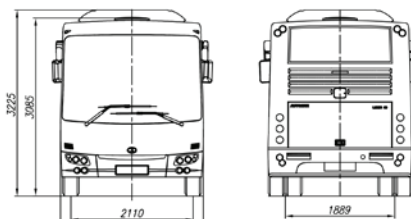

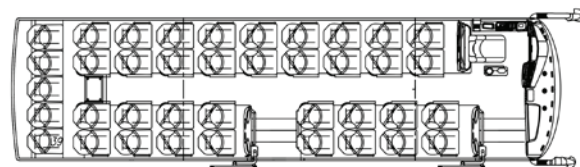

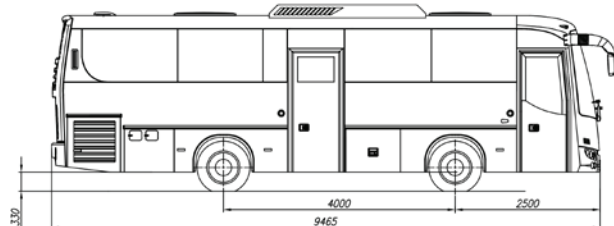

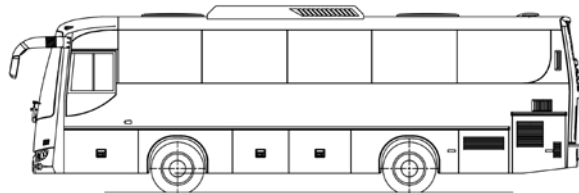

Steering system

Steering gear: with hydraulic power steering.

Steering wheel: regulated position with integrated lights switch.

Electrical system

24V, negative (-) ground, CAN, KIBES 32 system, batteries: 2 x 200 Ah.

BODY

The construction of the body is made of stainless steel rectangular tubes welded together. The outside paneling made of chrome-nickel sheets (sub-window belt) and GRP panels (front and back walls, roof) bonded to the framework. Side flaps made of aluminum.

Heating

Water heating unit connected to engine's cooling system + heaters.

Ventilation

Roof hatches, ventilation unit in the front wall and electric fan (exhaust) in the roof.

Air-conditioning

Passenger doors

Front and middle single-leaf, opening outwards, electro-pneumatically controlled from the driver's working place.

Outside mirrors

Electrically controlled, heated.

Luggage space capacity: 2,0 m³

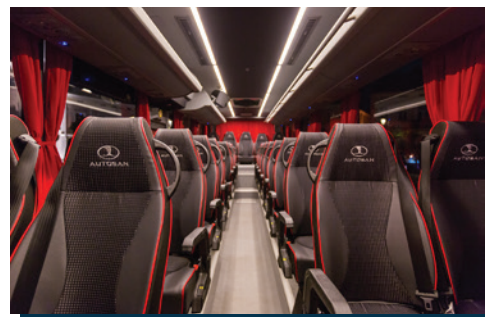

INTERIOR

Passenger capacity: seats 39, standing 19, total 58.

Passenger seats with high back-rest, rigid, with armrests on the side of the passage.

Ceiling and sidewalls trimmed with laminated panels, floor covered with a non-skid lining, under-ceiling luggage racks.

AM/FM/CD audio set.

OPTIONAL EQUIPMENT

- Automatic transmission
- Central lubrication system
- Tires pressure and temperature monitoring system
- Automatic detection and fire-fighting system in engine's compartment
- Intelligent speed limiter
- Heat insulating windows
- Elevator for transporting a disabled person in a wheelchair and a place for wheelchair mounting
- Reversing camera
- CCTV
- Outside door lightning
- Reclined passengers seats
- Seats equipment (table + net + headrest with logo)
- Guide's seat
- Driver's seat electrically heated
- Cash register mounting
- Ceiling and sidewalls upholstered
- 230V output sockets
- 24V socket
- LED antifog lights with cornering function
- CB radio
- USB charging ports in passengers compartment
- WiFi
- DVD audio-video set
- Electronic destination equipment
- Decorative wheel hub caps

* We reserve the right to make changes due to technical progress.

*Photos and drawings from the folder may contain additional items, not included in standard equipment.
